

WHAT IS CLAIMED IS:

1. Headwear for hunting, comprising:

a wearing portion for being worn on a head of a wearer; and

a visor portion projecting from the wearing portion,

5 wherein the visor portion comprises:

a base member for forming a shape of the visor portion, the base member having at least one seeing-through portion; and

a light control member attached to at least one side of the base member such that the light control member covers the seeing-through portion

10 and the wearer can see through the light control member when the headwear is worn on the head.

2. The headwear of claim 1, wherein at least two seeing-through portions are provided at the base member, the seeing-through portions being
15 arranged such that at least one seeing-through portion is provided at each side of the base member with respect to its central portion.

3. The headwear of claim 1, wherein the light control member

comprises a mesh.

4. The headwear of claim 1, wherein the wearing portion is hemispherically shaped such that the wearing portion covers the entire head
5 of the wearer.

5. The headwear of claim 1, wherein the wearing portion is a headband that enables the headwear to be elastically sustained at the head of the
wearer.
10

6. The headwear of claim 1, wherein the light control member is made of at least one of fabrics, plastics, and metals.

7. The headwear of claim 1, wherein the light control member is
15 provided with a camouflage pattern.

8. Headwear for hunting, comprising:
a wearing portion for being worn on a head of a wearer; and

a visor portion projecting from the wearing portion,

wherein the visor portion comprises:

a base member for forming a shape of the visor portion, the base member being made of a transparent material; and

5 a light control member attached to at least one side of the base member.

9. The headwear of claim 8, wherein the light control member comprises a mesh.

10

10. The headwear of claim 8, wherein the wearing portion is hemispherically shaped such that the wearing portion covers the entire head of the wearer.

15

11. The headwear of claim 8, wherein the wearing portion is a headband that enables the headwear to be elastically sustained at the head of the wearer.

12. The headwear of claim 8, wherein the light control member is made of at least one of fabrics, plastics, and metals.

13. The headwear of claim 8, wherein the light control member is
5 provided with a camouflage pattern.

14. Headwear for hunting, comprising:

a wearing portion for being worn on a head of a wearer; and

a visor portion projecting from the wearing portion,

10 wherein the visor portion comprises:

a circumferential member for forming a shape of the visor portion, the

circumferential member defining a hollow space therein; and

a light control member attached to at least one side of the base

member.

15

15. The headwear of claim 14, wherein the light control member comprises a mesh.

16. The headwear of claim 14, wherein the wearing portion is hemispherically shaped such that the wearing portion covers the entire head of the wearer.

5 17. The headwear of claim 14, wherein the wearing portion is a headband that enables the headwear to be elastically sustained at the head of the wearer.

18. The headwear of claim 14, wherein the light control member is
10 made of at least one of fabrics, plastics, and metals.

19. The headwear of claim 14, wherein the light control member is provided with a camouflage pattern.

15 20. The headwear of claim 14, wherein the circumferential member is made of at least one of a wire and a plastic.
